

## CASUALTY LIST WILL FURNISH HOME ADDRESS

### Latest Roll of Soldiers Killed and Injured Supplies Information.

With the publication last yesterday afternoon of a casualty list of eight names, the War Department resumed the practice of giving the home address of members of the American Expeditionary Force killed or wounded in France.

The last casualty list giving addresses of the soldiers was published several weeks ago. At that time the War Department decided that military information of value to the enemy was given when addresses were furnished and the publication of names of home towns was abolished.

At the same time the Committee on Public Information issued a refusal to handle the release of the casualty list on the ground that names without addresses were without news value.

The latest casualty list from overseas follows:

#### WILL URGE SENATE TO RESTORE PLAN

District Citizens Desire 50-50 Tax System Retained.

Even though the House of Representatives caught advocates of the half-and-half plan napping and struck out of the measure from the District appropriation bill these same advocates are going to fight hard to persuade the Senate, before whom the bill will be presented in a few days, to keep the measure in the bill and rely upon the conferees of both houses to agree to keep it there.

The Board of Trade, the Chamber of Commerce, the Bar Association, the Federation of Citizens' Associations, the Builders' and Manufacturers' Exchange, the Columbia Heights Citizens' Association, the Northeast Citizens' Association and the Georgetown Citizens' Association are all lined up to fight to keep the half-and-half plan in the bill.

#### PLAN NEW CAMPAIGN FOR WAR SAVINGS

The Executive Committee for the District of Columbia met yesterday to consider plans for renewing the work of War Savings immediately at the close of the Liberty Loan drive.

Several reports were submitted, among those being a report from Dr. E. L. Thurston, superintendent of schools. The total in stamps to the credit of the public schools now stands at \$152,247.67, with pledges amounting to \$25,155. In addition to this amount, there are 535 memberships to the \$100 Club which adds \$53,500 to the credit of the schools. Vice Chairman Gratz E. Dunkum, of the Fraternal Committee, announced that the Masons have placed a central War Savings office in the Masonic Temple and sold \$50,000 in stamps last month.

#### SUBMARINE WIRELESS STOCK IS DEMANDED

A demand has been made for the enemy owned stock in the Submarine Wireless Company, 39 Pine street, New York City, it was announced yesterday by the Alien Property Custodian. The company was incorporated in September, 1912, with an authorized stock of \$500,000.

While the individual holdings appear to be small, most of the stockholders are said to be Austrians, Germans and Hungarians. The purpose of the enterprise is not yet purely established, but among the counts and countesses in the stockholders' list are persons who are closely connected through marriage with Americans. The list reads like the latest edition of the Almanach de Gotha.

#### Miss May Allinson Gets War Appointment

The appointment of Miss May Allinson, of New York City, as executive secretary of the Committee on Women in Industry of the Advisory Committee of the Council of National Defense, was announced yesterday by the chairman, Mrs. J. Borden Harriman.

Miss Allinson was formerly assistant secretary of the National Society for Vocational Training. She succeeds Miss Amy Hewes, who will go to Chicago in an official capacity to look after the interests of women employees in government munition factories in the Chicago district.

## ORDERS TO BUY HOMES OR MOVE OUT CANCELLED

### Change of Heart by Landlords When War Department Acts.

Those landlords of Washington who forced all about the war and formed a "buy or quit" brigade some weeks ago, causing great distress and inconvenience to hundreds of tenants doing war work here for the government, by serving them with eviction notices, have experienced a change of heart, and for the most part have "withdrawn" their ultimatums.

Steadily during this week the number of complaints from Mr. Corcoran, tenant agent of the subject of "buy or quit," have been diminishing at the office of Maj. Z. L. Potter, chief of the housing and health division of the War Department. Only thirty-five kicks were registered by eviction-threatened tenants yesterday, as against 100 the day before.

#### Complaints Decrease.

The change of attitude on the part of the landlords, however, is indicated by the fact that practically all the eviction notices sent to occupants of Washington houses previous to this week have been rescinded by the landlords. Of these there were close to 200. There are fully the same number of cases still on hand at the housing bureau, representing this week's crop, but it is thought that most of these will be adjusted.

Landlords have interviewed Maj. Potter and Capt. Peyser, the latter having specific charge of the handling of these cases, through the medium of their real estate agents. In all these cases the former were brought to look at the matter in a reasonable and patriotic spirit which resulted in their leaving matters where they were before the profiteering scheme began.

Speaking yesterday about the boom in patriotic virtue among the city landlords, Major Potter said:

#### Boon in Patriotism.

"When the house owners realize that there's a very close relation between the eviction of a man working in the war and the proper prosecution of the war, they are usually in a mood to relent and let the tenant stay at the original figure. This is especially so when they are reminded of what might happen should the War Department take it into its head to take cognizance of house profiteering in a practical way. 'Certainly,' continued Major Potter, 'if the thing went on as it did last week, Congress would, in all probability, take some drastic action to stop it.'"

The unfair nuisance of landlord profiteering extended even to houses occupied by foreign officers. It became known yesterday. In these cases the War Department felt it to be particularly obnoxious, as these men from the allied nations, are here to help America win the war, and any hindrance put in their way affecting their proper housing, would be a decided impediment to their usefulness.

Major Potter cited yesterday the cases of the French landlords who were disposed to profiteer at the expense of American officers when they first arrived in France. This evil, he said, was speedily stopped by the French government when the latter was made aware of the condition of things.

#### Sly Shots at the Solons.

By THE OBSERVER.

Poor Paul Herriott has gone—one of the alert secretaries on the Senate side. He was one of Senator H. Johnson's organization ministers and a companion in most of the political history which the Californian made. To Paul's honor he died for his country—learning to be a flying soldier for Uncle Sam.

Samuel Gompers still keeps such a close place by the side of the President we hardly think he would do it if the President had never done anything for the laboring men of the nation.

Labor, we think, will have a trial after the war fully as acute as the one it is having now. But the people, with their minds off larger questions will then have time to weigh all the evidence carefully and pass a calm opinion upon it.

Let us see—it was under date of February 20, wasn't it, that Secretary Baker said we were months ahead in our aircraft program and it was on April 6—the anniversary of our entrance into the war—that the Public Information Committee used the quotation for benefit of the people of the nation.

Why does Hoke Smith introduce military bills, inquires some scribe. That's easy. 'Tis a military age and Hoke is keeping up with the times. He doesn't propose to be kept in the background.

Mr. Brisbane, as he grows closer to the great potato regions of the country, through his assumption of the editorship of the Herald and Examiner, will learn to know that potatoes "are not sacked in barrels."

Congressman Barnhart, chairman of the printing committee, comes of a long and distinguished family in the printing world. The name is synonymous with "delivery of the goods."

Up in the air over aircraft—that is the net result of the investigations of this branch of our war affairs. But the results of the investigation are to come from a firm understanding of the situation, a ground-work which could not be disputed.

Senator Sherman's speech on "whirling dervishes" may be meant for consumption in Illinois, but it has produced hysterics elsewhere, we believe.

Senator Ashurst can say things the way he wants to without great difficulty. But he doesn't always speak his mind by a good deal—which he considers a good test of a competent lawmaker.

Legislatures are lowly places in which to make a start in public life but many of our national solons got their start there—and have been going ever since.

Herbert Quick, of the federal farm loan board, is sawing wood—and woe betide the republican who wants to attack the farm loan system during the coming campaign. We utter this as a prediction, not as a threat.

No, Wilbur, the R. H. Creel of the federal health service is not the Mister Creel of the well, shall we say the Un-healthy Service.

Before you forget hurry home with a bond and hasten the Hun's humbling.

## ITALIAN REFUGEES TO RECEIVE D. A. R. HELP

In a resolution adopted by the Daughters of the American Revolution yesterday, all chapters in the organization are asked to aid in the work of assisting suffering Italian refugees from occupied territory, and also furnishing assistance to the families of dead and wounded Italian soldiers.

The resolution, which recites the allies' debt of gratitude to Italy for her part in the war, was offered by Mrs. Allen Perry Lovejoy, of Janesville, Wis.

## SOUTHERN SHIPYARDS MAKE QUICK STRIDES

"Amazing Progress" Is Term Used by Naval Architect.

"Amazing progress in the southern shipyards," is reported by L. Prior, naval architect of the Emergency Fleet Corporation, who has just completed an inspection of the yards from Florida to Texas.

Swamp regions, he found, had been transformed into thriving industrial communities, filled with able shipbuilders who a year ago knew little or nothing of building ships.

Mr. Prior is convinced that larger ships should be built in the south, and one of the results of his tour is the decision of the Emergency Fleet Corporation to place in the South many of the contracts for the 200 wooden ships of 4,000 tons minimum recently authorized.

These new ships to be built in the South will be of the Daughtery type, somewhat like the War Marvel recently launched at Orange, Texas, which will be the largest steam propelled ship ever put into the Transatlantic trade. A prominent feature of the Daughtery type is the use of diagonal planking, both for strength and for facility of supply. This will be the first use of diagonal planking in American ships, although Australia has used the method for ocean vessels with complete success.

The Ballin type wood ship, also a part of the new 200, will be built on the Pacific coast, where it was developed.

## D. C. RENT BILL REPORT READY FOR CONGRESS

### Senate Committee Putting Finishing Touches on Profiteering Measure.

With the exception of a few minor details, the Pomerehne anti-profiteering bill is nearly ready to be reported back to the Senate for consideration. The Senate District Committee went over the measure thoroughly yesterday. A reprint of the bill has been ordered and the committee will meet again this morning and put on the final touches.

The amendment to prevent "colored" sales has been materially strengthened, providing that tenants shall not be disturbed by the landlords unless he himself desires to live on the property when the lease expires. All sales of property shall be made subject to the lease, and under no circumstances will tenants be disturbed while they pay their rent and behave themselves.

Commissions on the sale of real estate must not exceed two per cent, with a minimum of \$5 if agreed to by the parties in interest, when the exchange value is not in excess of \$1,000.

Still another amendment adds a jail sentence as well as a fine for offenders. Chairman Ben Johnson, of the House District Committee, who originally introduced the rent profiteering bill, is quoted as being entirely out of sympathy with the Pomerehne measure, giving as a reason that he thought the measure played right into the landlords' hands instead of protecting the tenants.

#### PROVIDES PLURAL VOTING.

Amsterdam, May 2.—Votes taken in the Prussian Lower House involved the rejection of the socialist, Braun's, proposal of the right to vote beginning with the twentieth birthday without distinction of sex and the acceptance of a committee resolution providing for plural voting.

## COAL TO NEW ENGLAND ORDER NOW REVOKED

Special orders providing for the diversion of coal to New England, issued during the critical period of last winter, were revoked yesterday by Dr. Harry A. Garfield, the Fuel Administrator.

These orders, it was explained, are no longer necessary now under the zoning system. Provision for supplying New England has been made in the zone system recently put into effect by the Fuel and Railroad Administrations. The revocation order becomes effective May 8.

## TRADE AGREEMENT MADE WITH NORWAY

United States Will Send Supplies in Return for Imports.

The United States and Norway yesterday completed a general commercial agreement. This is the first general agreement to be reached between this country with one of the northern neutrals, it was said at the War Trade Board.

The agreement was signed by Vance C. McCormick of the War Trade Board, and Dr. Fridtjof Nansen, special representative of the Norwegian government in this country.

The agreement assures to Norway supplies to cover her estimated needs, insofar as those can be supplied without detriment to the war needs of the United States and its associates in the war. It contains long schedules enumerating the quantities of foodstuffs, fodder, fertilizer, textiles, metals and minerals, rubber and miscellaneous commodities which Norway is entitled to receive.

Norway, for its part, agrees to permit the unhampered export to the United States and its associates in the war of all Norwegian products not needed for home consumption.

There are no tonnage strings to the agreement, it was stated at the War Trade Board. The arrangement is purely and solely one by which Norway may procure necessary supplies.

Children Wreck Train To See What Happens

Seeks \$10,000 Damages For Injury by Car

Fargo, N. D., May 2.—Two children told officials of the Northern Pacific Railroad they had stolen locks from switches and intended to wreck the North Coast Limited, carrying 300 passengers, near Casselton, just to "see what would happen."

The train, which left Chicago Monday night, was derailed Tuesday evening, four cars and the locomotive jumping the rails.

Elizabeth Boston, administrator of the estate of Augustus Boston, deceased, yesterday brought suit in the District Supreme Court against the Washington Railway and Electric Company for \$10,000 damages alleged to have been sustained March 12 last when he 4-year-old son was run over by an electric car of the Ledroit Park line at Fourth street northwest, and crushed to death.
